The LEAF TERMINATOR® is made of 100% quality aluminum and is .024 inches thick. Its patented and interlocking design works to keep gutters clear and free flowing allowing for water to flow into the gutter while leaves and debris fall to the ground. The Leaf Terminator® is installed over existing gutters. It is screwed to the roof with deck screws and to the top of the gutter with color matching zip screws. The Leaf Terminator® has a one inch overlap at each connection.

The Leaf Terminator® underwent some of the most rigorous testing by PRI Technologies, a leading testing company for the nation's top ranked roofing and construction organizations. The testing results proved that it's engineered to last. The tests revealed without any doubt that The Leaf Terminator® can:

- Rainfall of 22 inches per hour
- Withstand winds up to 110mph
- Hold up to 1200 lbs. per square foot, which means heavy snow and ice will not affect its performance.
- Prevent leaves and debris from entering the gutter

The Leaf Terminator's® patented design protects your property by eliminating the problems associated with clogged gutters. Leaf buildup adds more weight and strain on the gutters, slowly pulling your gutters away from the fascia resulting in expensive repairs. Gutter overflows can quickly cause damage to landscaping, ruin basements and destroy the foundation of a home or structure. Improperly cared for gutters can also lead to other serious and possibly more unnoticeable problems including, but not limited to mold, mildew and rot.

While protecting your home, The Leaf Terminator® will also add beauty and value. The uniquely designed cover custom fits to your gutters ensuring a proper fit while its low profile blends into the roof line. Leaf Terminator® is available in a variety of colors including genuine 16 oz. copper and is available in three sizes to accommodate 5 to 14 inch gutters:

Available in a variety of colors

Fits most popular roof styles

- 1200 Series** - for 5" Gutters
- 1500 Series** - for 6" and 7" Gutters
- 2000 Series** - for 8" - 14" Gutters

Our product blends directly into your existing gutters with easy installation, no mounting brackets or hangers for that attractive look to your home or structure that you desire. Leaf Terminator® is **compatible with all roof styles and can be utilized with a heat cable to prevent ice and snow buildup.**

In addition, not only do you increase the value of your investment, you eliminate the task and risk of gutter cleaning. More than 100,000 people a year suffer serious injuries from falls while on a ladder, the majority of these occur at heights as low as 10ft, the height of a single story home. The average cost of an injury from a ladder fall is \$4,000 that is just upfront cost of hospital stays, prescriptions and physical therapy.

When installing Leaf Terminator® on a home with a metal roof, the product should be bent to a 90° angle where it meets the gutter board. The Leaf Terminator® is then attached to the gutter board and to the gutter for maximum strength.

Leaf Terminator®, the right investment!

Leaf Terminator® has a twenty year transferable paint finish warranty against chipping or blistering. It has a transferable lifetime performance.
